2. (S//NF//SK) VIEWER TASKING: Access and describe target of
intelligence interest at Coordinates [REDACTED]

3. (S//NF//SK) COMMENTS: Viewer and interviewer agreed on the implementation of a strategy to deny AOL from contaminating the session. Perceived, comparative statements were identified as AOL upon utterance; 018 appeared successful in dealing with AOL. The number of missiles stored at the target site remained undetermined.

1. (S-SS) Statistics: Viewer: 018
Session date: 6 NOV 87

2. (S-SS) The session was conducted in the ERV mode.

3. (S-SS) The impressions of the session were very confusing. They were mainly of a low, fairly flat-topped structure with sides which were open at regular intervals. A distant overhead view showed this structure to be "T" shaped (see drawing #2). The structure is located in a place with lots of trees.

4. (S-SS) Inside the structure is a confusing jumble of "junk". There are objects which seem to be completely unrelated to each other, located randomly everywhere. The one object of interest appeared as a tall, narrow, yellow "thing" (see drawing #3). There appeared to be only 3 or 4 of these yellow things located in the main part of the structure, but there was also an impression of several more "moving" in a straight line along the stem-part of the "T" structure.

5. (S-SS) There was another object of interest which appeared to hang from the ceiling. It is an open oval (see drawing #1). There are several of these hanging in a line inside the structure.
